## APPENDICES

### **Appendix 1 Language requirement with non-Dutch diplomas**

#### *for English-language (selective) post-initial master's programmes*

- a. Persons holding one of the following diplomas are exempted from the language proficiency tests (English) referred to in Article 2.1:
  - a diploma issued in a country in which English is the official language of communication and instruction.

### **Appendix 2 Language of Instruction**

In the Master's study programmes, the language of instruction is English or another language.

The appropriateness of English or another language as language of instruction is determined by the international orientation of the programme in terms of its academic field of study and/or the fact that it prepares students for a specific field of activity or professional career in an international setting.

Master's study programmes

The choice for the language of instruction of the programme is in line with the UM Code of Conduct on language in accordance with the Dutch Higher Education and Research Act (WHW) art. 7.2.

Because of the specific educational nature and profile of the programmes, teaching and examinations are conducted in English. This guarantees the quality of education, because:

1. The content of the programme has an international orientation and focus.

Besides the learning goals

- (1) "Knowledge and insight" (Our graduates are able to develop insights based on academic knowledge in a self-directed manner) and
- (2) "Academic Attitude" (Our graduates are able to demonstrate an academic attitude), the following two learning goals, which explicitly state an international focus, apply explicitly to the programme:
- (3) "Global Citizenship" (Our graduates are able to actively engage in the global community in a globally responsible manner) and
- (4) "Interpersonal Competences" (Our graduates are able to demonstrate excellent interpersonal competences in an international professional setting).

These four learning goals are characteristic for all SBE Master's study programmes. They are translated into programme specific programme objectives, which are offered and measured in obligatory as well as elective courses of the programme.

In line with the goals and content of the programme, all course material is based on international research and literature, which is in English.

2. The academic community is internationally oriented and the staff is international: Aligned with the learning goals and objectives an international classroom setting is a core element of the educational concept of the programme, where English is the common international language.

In order to make the concept work optimally, an internationally diverse student population as well as an internationally diverse group of teachers/staff, which are able to communicate in a common language (English), is indispensable.

3. The labour market demand is internationally oriented (English speaking) alumni. The graduates of the programme are well prepared to work in and with internationally

oriented companies, such as the “big 4” consultancy companies, multinationals, banks, but also medium small enterprises, and national or international public institutions, in majority operating on international settings and in international markets.

4. The student intake and current population is internationally divers and English is the common language.

On average (all programmes) Master’s study programmes have an intake of 40% Dutch and 60% non-Dutch students.
